

Revenue Tonnage Loaded and Discharged by Port

The data on these two pages represent the revenue tonnage reported to PMA in 2017 by category by port. There are six sets of columns: one set for total revenue tonnage and one set for each of the five reporting categories.

Since November 1989, tonnage has been reported in "Loaded" and "Discharged" categories. Concurrent with that change in reporting, the summaries of the tonnage data which had been traditionally prepared for statistical purposes by "port area" were further divided into individual port summaries.

Ports have been arranged geographically south to north along the coast. Ports along bays or rivers are listed as though the coastline followed the edge of the interior body of water.

Revenue Tonnage Loaded and Discharged by Port
