

## More Than 60% of Hours are Paid in Los Angeles/Long Beach; Coast Hours Up 6.8% Over 1999 (Year-to-Date)

Average weekly hours paid on the Coast at longshore, clerk and foreman occupation codes have increased steadily since 1996 to the present level of 488,200 per week (13 week averages). In comparison, the first quarter of 1996 averaged 332,600 per week.

In the first quarter 1996, hours paid in Los Angeles/Long Beach accounted for 50.7% of the total hours paid on the Coast, and in the third quarter of this year, that percentage has increased to 63.4%.

The chart to the right shows the percent of coast total hours paid in each of the five major port areas on the West Coast and the total paid in all other West Coast ports. Each of the alternating bands of light and dark shade represent one payroll year, and the value for each of the four quarters is shown within the band for the year.

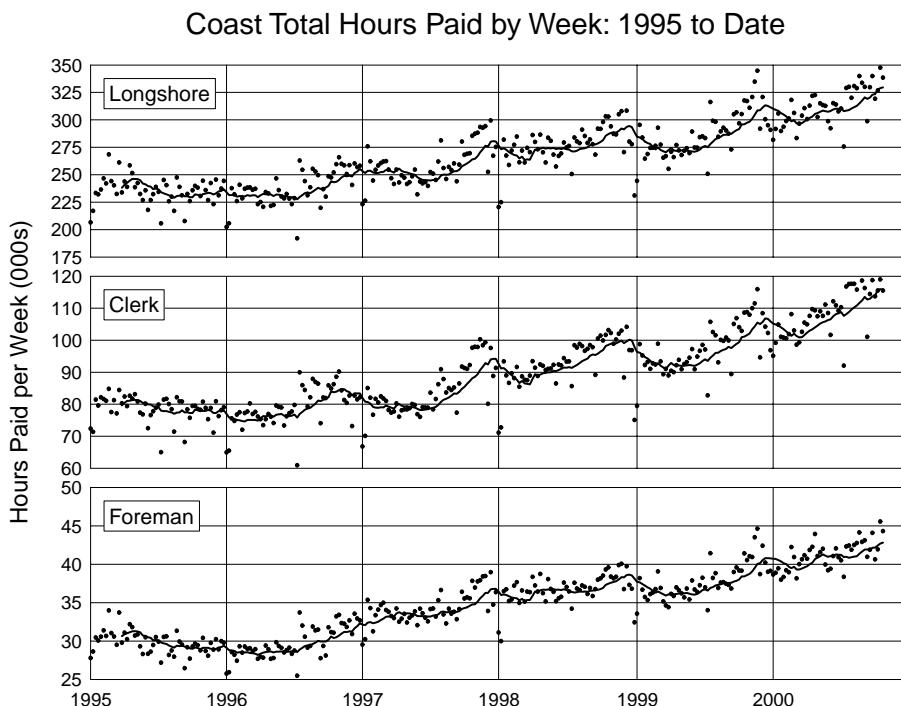

Los Angeles/Long Beach is the only port region that has consistently increased its share of the Coast hours. The SF Bay Area saw a decline in its portion of the Coast total in 1995 and 1996 and has maintained its "labor share" since then. Tacoma, after a loss in its labor share in 1997 and 1998, has recouped back to nearly the same as its

1995-1997 levels. All other ports have shown a net loss in labor share.

### Totals by Occupation Type

The charts below show the weekly hours paid on the Coast since 1995 by major occupation code category: longshore, clerk, and foreman codes. Each small dot represents weekly hours, and the solid lines represent 13-week moving averages.

Hours in each category have shown the same pattern—a general increase since mid 1996. In the most recent 13 weeks shown, 329,600 hours were paid at longshore occupation codes; 115,800, at clerk; and 42,800, at foreman. These represent a 34.6% increase in longshore, 47.6% in clerk, and 29.1% increase in foreman occupation codes above the 2nd quarter 1996. Overall, hours have increased 41.8% in the same period.

The table below shows the total hours, in millions of hours, paid by payroll year, with 1998 and 2000 annualized to 52-week periods. (The payroll year 1998 was a 53-week period.)

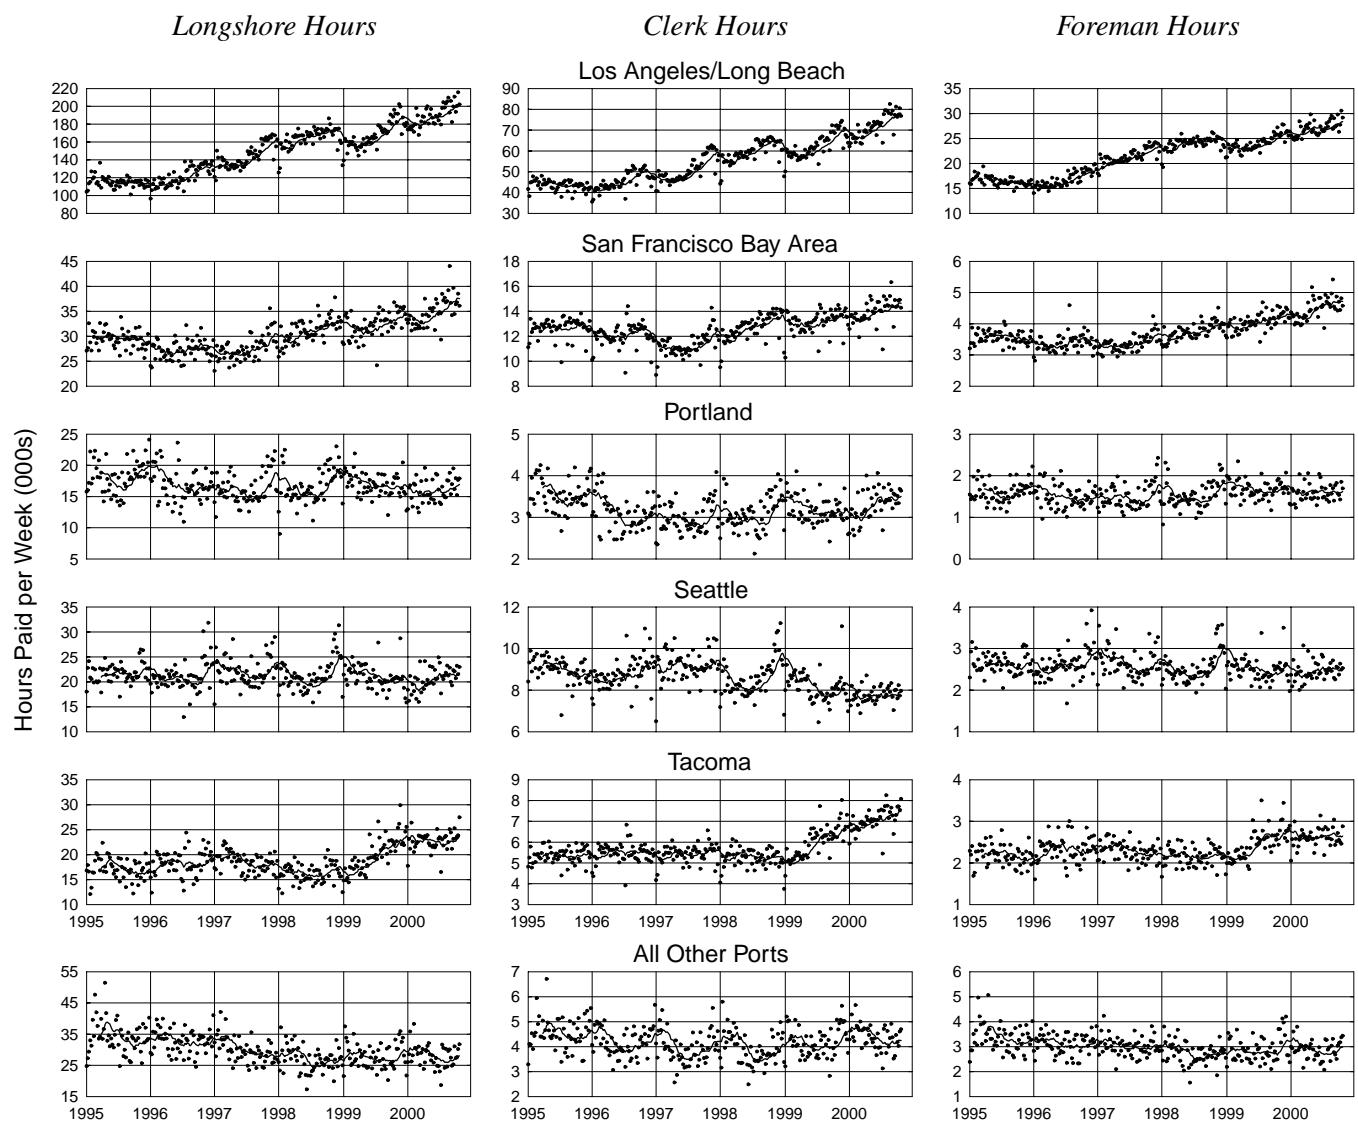

### Coast Total Hours Paid by Payroll Year Annualized to 52-week Periods (000 000s)

	Longshore	Clerk	Foreman	TOTAL
1995	12.239	4.085	1.549	17.874
1996	12.382	4.113	1.548	18.043
1997	13.451	4.368	1.786	19.604
1998	14.382	4.836	1.910	21.128
1999	14.946	5.074	1.967	21.987
2000	16.257	5.650	2.142	24.049

If hours for the remaining weeks of 2000 were to continue at the present rate, the 24 million hours would represent the largest one-year increase in percentage (+9.4%) of the period studied.

### Hours by Port Area

The charts on page 2 show weekly hours paid in each of the five major U.S. West

Coast port areas by category of work. The bottom set of charts shows the hours paid in all of the other ports on the Coast.

The graphs are exactly analogous to those on page 1 for the Coast total hours.

Los Angeles/Long Beach is the only port region shown in which hours paid at all three occupation categories rose consistently (ignoring the seasonality seen in almost all of the graphs) throughout the period.

## Monthly Tonnage by Reporting Category and Weekly Hours by Occupation Code Type

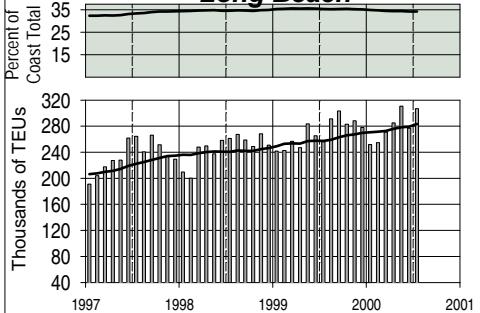

Bars represent monthly tonnage or weekly hours; solid lines represent 12-month or 13-week running averages.

## Major Container Ports: Monthly TEUs Reported & Percent of Coast Total TEUs

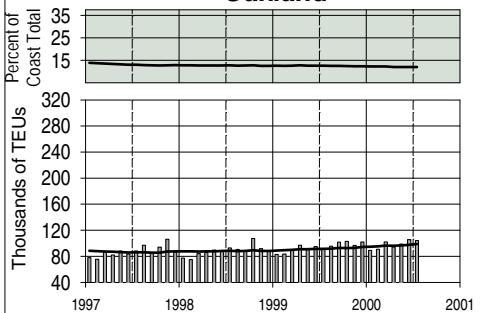

### Los Angeles

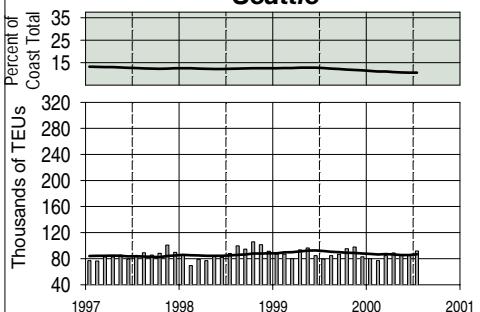

### Long Beach

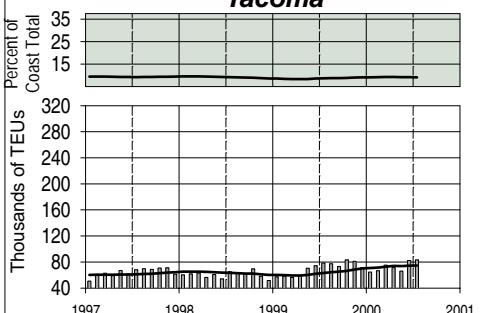

### Oakland

### Seattle

### Tacoma

Shaded graphs show 12-month moving averages of TEUs reported in the port as a % of the coast total. Vertical bars represent TEUs reported in the port each month; lines are 12-month moving averages.
